#### **DETAILED ACTION**

1. This office action is in response to Amendment filed on September 13, 2006. Claims 1, 2, and 4-46 have been cancelled. New claims 47-70 have been added. Claims 3, and 47-70 are currently pending and are under examination.

#### Election/Restrictions

2. Newly submitted claims 51-70 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The originally elected invention is drawn to an isolated nucleic acid molecule identified by SEQ ID NO: 115, and the new claims are drawn to distinct compositions, such as a genetically engineered host cell, comprising a recombinant vector comprising a distinct polynucleotide sequence. The new claims are also directed to the distinct invention claiming a method of producing a polypeptide.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 51-70 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03. Claims 47-50 are not withdrawn because the claims are drawn to an isolated nucleic acid.

Claims 3, and 47-50 are currently pending and are under examination. 3.

### Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112: 4.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

Application/Control Number: 10/721,793

Art Unit: 1656

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Page 3

- Claims 47-50 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are drawn to isolated nucleic acid sequences comprising at least from 83% to 95% identity to SEQ ID NO: 115. Applicant cites originally filed claims 1-4, and 32, pages 8, and 9, Table 1, pages 10-15, and Examples 7-10 for support of newly submitted claims 47-50, but review of those sections of the disclosure do not describe support for the submitted claims. This is a New Matter rejection. Applicant is required to cancel the new matter in the reply to this Office action.
- 6. Claims 47-50 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The Court of Appeals for the Federal Circuit has held that a "written description of an invention involving a chemical genus, like a description of a chemical species, 'requires a precise definition, such as be structure, formula [or] chemical name,' of the claimed subject matter sufficient to distinguish it from other materials." *University of California v. Eli Lilly and Co.*,

Application/Control Number: 10/721,793 Page 4

Art Unit: 1656

1997 U.S. App. LEXIS 18221, at \*23, quoting Fiers v. Revel, 25 USPQ2d 1601, 1606 (Fed. Cir. 1993) (bracketed material in original).

"In claims involving chemical materials, generic formulae usually indicate with specificity what the generic claims encompass. One skilled in the art can distinguish such a formula from others and can identify many of the species that the claims encompass. Accordingly such a formula is normally an adequate description of the claimed genus. In claims to genetic material, however, a generic statement such as 'vertebrate insulin cDNA' or 'mammalian insulin cDNA,' without more, is not an adequate written description of the genus because it does not distinguish the genus from others, except by function. It does not specifically define any of the genes that fall within its definition. It does not define any structural features commonly possessed by members of the genus that distinguish them from others. One skilled in the art therefore cannot, as one can do with a fully described genus, visualize or recognize the identity of the members of the genus. A definition by function, as we have previously indicated, does not suffice to define the genus because it is only an indication of what the gene does, rather than what it is." UC v. Lilly, at \*24-\*25, thus the above claims lack adequate written description. One of skill in the art cannot visualize or recognize which nucleic acid sequences can be modified and/or mutated such that the polynucleotide with reduced percent identity retains the function of a toxin affecting sodium and potassium channel activity as disclosed for SEQ ID NO: 115.

## Allowable Subject Matter

7. Claim 3 is allowable. The prior art does not describe an isolated nucleic acid comprising SEQ ID NO: 115.

Art Unit: 1656

- 8. Claims 47-50 are not allowable.
- 9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anand U. Desai, Ph.D. whose telephone number is (571) 272-0947. The examiner can normally be reached on Monday - Friday 9:00 a.m. - 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathleen Kerr can be reached on (517) 272-0931. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
